Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 February 2003.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 13 and 14 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Shimizu et al. U.S. Patent 6,043,162 A.

Shimizu et al. discloses a method to prevent generation of contaminating particles in a chamber, comprising; evacuating an ordinary gas within said chamber (see column 4, lines 13 and 14); injecting a treatment gas into said chamber to treat a surface of said substrate (see column 4, lines 14 and 15); increasing a pressure in said chamber to greater than or equal to atmospheric pressure by injecting a moisture displacing gas (nitrogen) into the chamber; and withdrawing said treatment gas from said chamber while injecting the moisture displacing gas into said chamber and preventing atmospheric air from entering the chamber (see column 4, lines 41-50).

Allowable Subject Matter

3. Claims 1, 4 and 6-12 are allowed.

Art Unit: 2812

4. Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art either singularly or in combination failed to anticipate or render obvious the limitations of increasing the pressure within the chamber to greater than or equal to atmospheric pressure by injecting a nitrogen gas into the chamber and drawing out the surface treatment gas from the chamber while injecting the nitrogen gas, the surface treatment gas converting the substrate surface into an organic material as required by claim 1.

Response to Arguments

6. Applicant's arguments with respect to claims 1, 4 and 6-15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mandal and Kirlin et al. disclose processes wherein a substrate surface is converted to organic by using a surface treatment gas and the surface treatment gas is drawn out of a chamber by using a nitrogen purging process.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

9. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
